Laws

— Visual Impairment (inability to see)

different laws in europe and india.

for all website.

only government website

accessible

accessible

— GDPR Compliance (EU Rule)

(GDPR - General Data Protection Regulation)

— It is a set of rules designed to give individuals more control over their personal data.

— It's essentially a "bill of rights" for internet age.

— GDPR covers general data privacy for everyone.

— HIPPA Compliance

(HIPPA - Health Insurance Portability & Accountability)

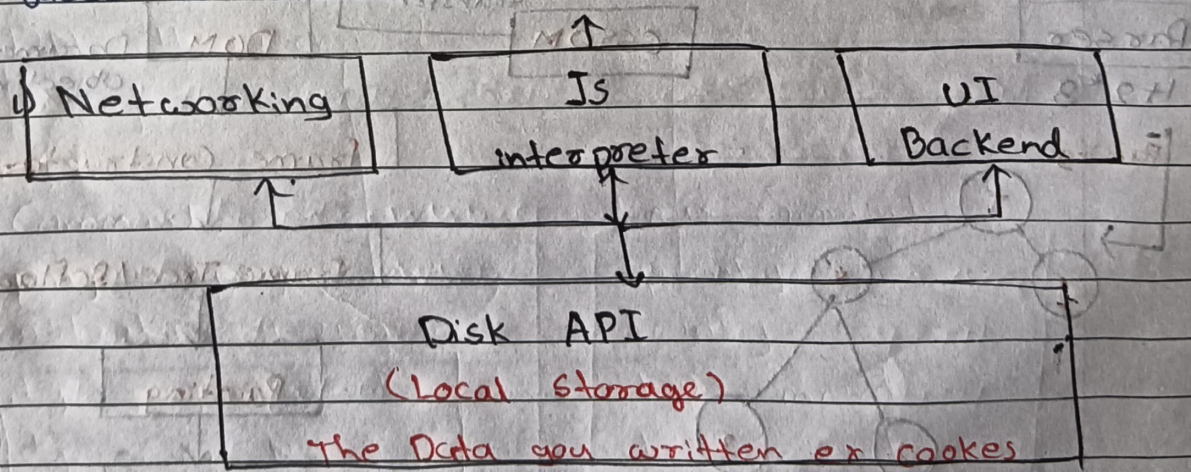

— is a US law specifically focused on medical and health information.

Ex:

it's the reason a doctor can't share your medical records with your boss or a random telemarketer without your permission.

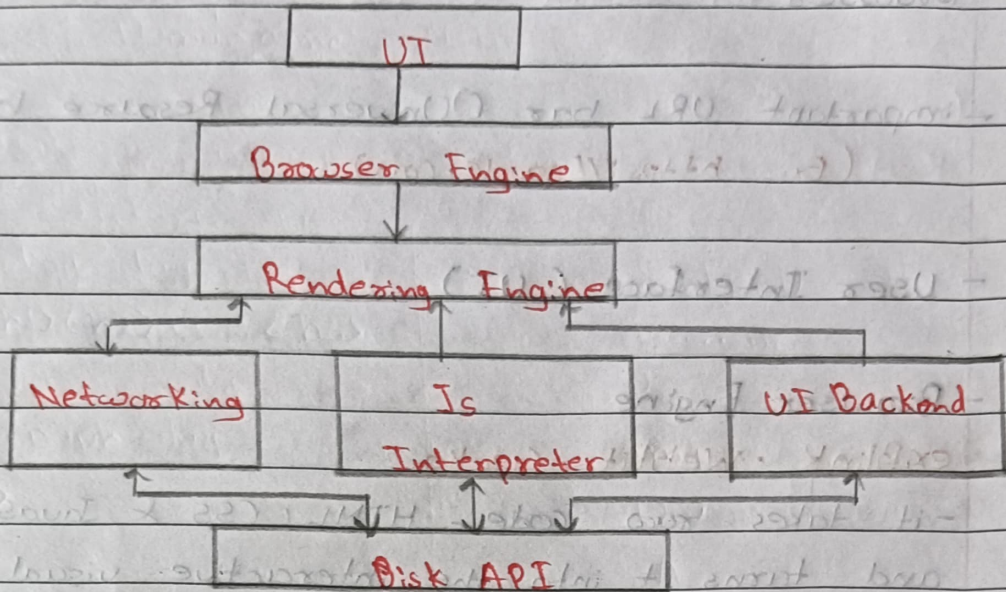

Browser

- important URL bar (Universal Resource Locator)
(Ex: <https://google.com>)
- User Interface (UI)
- Browser Engine
ex: Blink, WebKit, Gecko
 - it takes raw code - HTML, CSS & JavaScript and turns it into the interactive visual webpage you see on your screen.
- Rendering Engine
 - It is a part of browser engine responsible of visual "printing" of the website
 - If the browser engine is the "manager" of the whole process, the rendering engine is the artist that draws the pixels on your screen based on instruction it receives.
